The *Journal of Clinical Microbiology*, a publication of the American Society for Microbiology, 1913 I St., N. W., Washington, D.C. 20006, is devoted to the dissemination of new knowledge concerning the applied microbiological aspects of human and animal infections and infestations, particularly regarding their etiologic agents, diagnosis, and epidemiology. Papers dealing with antibiotics and antimicrobial agents and chemotherapy, with fundamental aspects of infection and immunity, and with food or dairy microbiology fall within the scope of other ASM publications. The *Journal* is published monthly, and the twelve numbers are divided into two volumes per year. The nonmember subscription price is $60 per year. The member subscription price is $14 per year. Single copies are $6. Correspondence relating to subscription, reprints, defective copies, availability of back issues, lost or late proofs, disposition of submitted manuscripts, and general editorial matters should be directed to the ASM Publications Office, 1913 I St., N.W., Washington, D.C. 20006 (area 202 833-9680).

Reprint of a small classic - from ASM

Milestones in Microbiology

Translated and edited by **Thomas D. Brock**

ASM is pleased to be able to offer a reprint of this small classic, which first appeared in 1961, and subsequently went out of print. MILESTONES is a collection of historically significant papers in microbiology, and is intended both as a book of general interest to all microbiologists and as an enlightening, thought-provoking text for students. Many professionals will want to read this book for its value in firmly documenting the great work in microbiology accomplished during the past 400 years. The book should also prove useful in teaching microbiology to students at all levels of development.
